

June 2011

No meeting of the Willoughby Society this month as members attended the Annual dinner at Draycote Hotel.

Weather report

The month began fine and warm but the weather became more unsettled. The

Midlands did stay relatively dry. The last week of the month did give us a short lived warm spell and we experienced the highest temperatures of the year so far.

Nature Notes

Following the Village Walk Around (See May Nature Notes) wildlife improvement planting will take place on 9 July 2011. Warwickshire Wildlife Trust will send one of their members on the day with the tools required and the wild flower plugs. The event will be publicized in the Willoughby Monthly and we hope a good number of Society members and villagers will help with the planting.
